## Rosenbad, Regeringskansliet, Sweden

### DCS 6000 Digital Conference System

Rosenbad, the Swedish national government conference centre has been upgraded with yet another DIS conference system including microphones and simultaneous interpretation equipment. For more than a decade the previous system has been working satisfactorily, and therefore DIS was granted the job.

The task was now to update the technology while keeping the architecture of the room changed as little as possible. The system includes 34 delegates and 1 chairman plates - all built into the tables. Each seat features a built-in local loudspeaker, a gooseneck microphone, push-to-talk buttons and channel selectors. The four interpreter booths are each equipped with digital interpreter sets capable of handling 32 channels/languages.
