

Ministry of Defence of Georgia

DCS 6000 Digital Conference System

The vision for the Ministry of Defence of Georgia is among other things to continue participating in international peacekeeping and stabilization operations, in a manner, which highlights its commitment to world peace and the global war against terrorism. Georgia is committed to being not only a consumer of global security, but also a provider.

All this requires various international meetings and conferences. Because of that the DIS distributor in Georgia Georgian Integrated Systems (GIS) Ltd. has equipped the Ministry of Defence of Georgia with the digital conference system DCS 6000 including simultaneous interpretation for 100 participants.

The conference package features a central unit CU 6010 handling the system and a number of microphone units with built in channel selectors CM/DM 6070 P for the delegates and the chairman and last but not least Interpreter Sets IS 6132 for the interpreters.

GIS Ltd. has supported with extra conference equipment for various international conferences organized by the Ministry of Defence of Georgia.
